## 1 Executive Summary

---

This deliverable presents the public web portal designed for VERSATILE. Located on <http://versatile-project.eu>, the web contains the main information about the objectives, mission and vision of VERSATILE, as well as the structure of the project.

The purpose of the web portal is to maintain public the activity and progress in the project, the dissemination activities and list of publications will be updated periodically on the section **Documents & Publications**.

Looking for direct contact with the interested stakeholders on VERSATILE developments, direct email to the project coordinator and partners on the consortium have been included.

## 2 Introduction or Background

---

Task 7.1 (Public web portal) is mandatory to design, implement, centralize and manage VERSATILE public activities. VERSATILE web page contains basic information about the project, and it is responsibility of the project coordinator to maintain updated the contents of the web with public information about the project activities.

In later stages of the project, all dissemination activities and main results will be included.

In the next section will be explained the followed template and the current contents.

## 3 Description of the Web Portal

---

### 3.1 Page Structure

Page location: <http://versatile-project.eu>

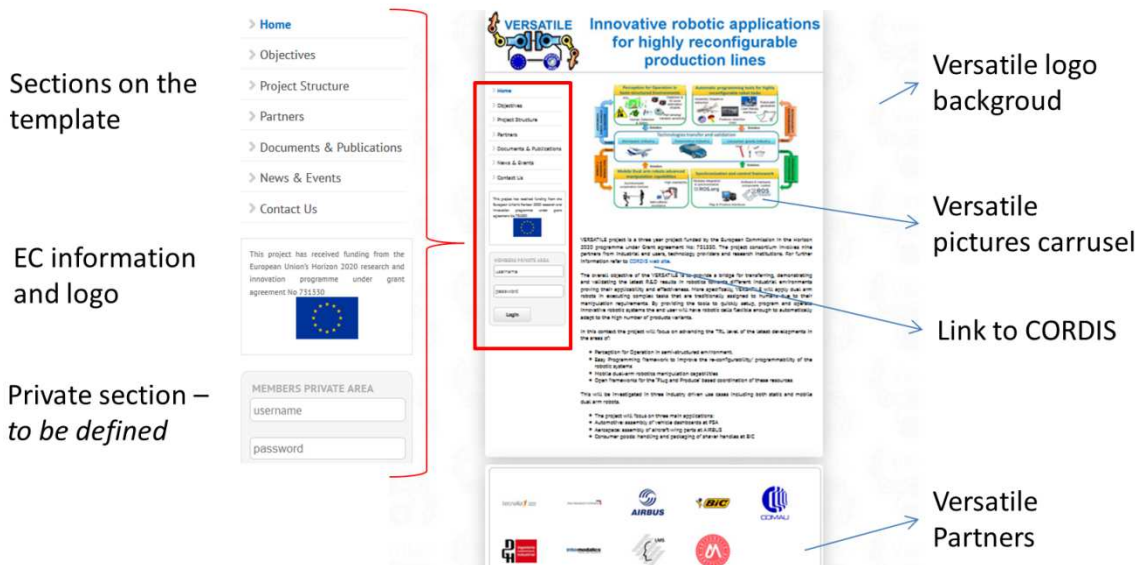

Fig 1. VERSATILE Public Web Portal – Home section screenshot

The web page will be maintained as public during 4 years (three years for the project duration plus one for dissemination and further contact activities).

Regarding the Private section, it will be connected with the VERSATILE intranet (see D8.1: VERSATILE internal web portal for partners interaction). However, definition will be discussed with the partners after interaction with the intranet (during the first six months of the project).

### 3.2 Home

<http://versatile-project.eu/content/home>

Summary about the project is presented in this section. The picture-carousel will be updated with pictures about the partners activities and information from the use cases.

### 3.3 Objectives

<http://versatile-project.eu/content/objectives>

The objectives that structure the developments in the project are summarized on this section. Additionally, for dissemination and exploitation activities, it was included the direct benefits for OEMs.

In the third year of the project, this section will be updated with the demonstration of the objectives achieved.

### 3.4 Project Structure

<http://versatile-project.eu/content/project-structure>

This section presents the scheduling of VERSATILE and how the phases of the project are related with the different work packages.

Additionally, the WPs description and the partners involved were included. Direct links for additional information about the activity on the WP is shown.
